

Media Replacement Policy

Filtration media efficacy will naturally decrease over time until the media become relatively ineffective. At this point, the filtration media will need to be replaced.

When this is required, VIRGO Water Systems will provide our existing customers with a pre-filled and ready-to-install replacement tank that can quickly and easily replace the old VIRGO unit simply by removing the old tank and replacing it with the new one.

Please contact your local plumber when it is necessary to order a replacement tank for your VIRGO CRYSTAL, or VIRGO CLEAR unit.
